Profile

Highly motivated and experienced software developer with a strong passion for challenges and programming. With more than two years of hands-on experience in development, I specialized in front-end development using ReactJS and TypeScript, and also gained proficiency in PHP, Laravel, and TailwindCSS.

My expertise covers both front-end and back-end development, with a growing interest in mobile development. I demonstrated my technical skills and innovation through personal projects like DevNotes, a visually appealing to-do list app with subtle animations, and OrçaWeb, an intuitive expense management app with visual feedback.

I am always looking for new challenges to further expand my knowledge and contribute to innovative projects. Let's connect and discuss how we can collaborate on exciting IT opportunities! Check out my portfolio at <https://github.com/gafanhotoalexandre>.

Professional Experience

02/2022 – 06/2022
